HISTORY TIMELINE

It is May 1991.
Uniform Safety Signs is born!
Started in a 60sqm garage
as an agent selling signs
for a local company.

1991

Business is growing!
Moved into a new factory,
over 5 times the size of
the original garage.

1994

Recruitment Starts!
Our first staff member,
a screen printer, joins
Uniform Safety Signs

1997

1995

The Power of Marketing!
Our first colour catalogue
was designed and printed.
Sales increased by 50%!

1993

Manufacturing Begins!
Our very first screen printing
machine and vinyl cutter were
purchased, allowing us to
stock a small range of signs.

1999

Expansion Plans!
Moved into a new
building double the
size to accommodate
our growth.

Importing!
First container load of
traffic products lands in our
warehouse for distribution.

2003

Capital Expenditure!
UV Printer and CNC router
was purchased to assist in
the production of custom
made signage

NSW Branch Opened

Smoking tobacco is recognised as one of the largest preventable causes of death and disease in Australia. Each year, smoking kills an estimated 15,000 Australians and costs Australia \$31.5 billion in social, health and economic costs. The Australian Government have committed to reduce the national daily smoking rate to 10%.

WET CHEMICAL EXTINGUISHERS

FEATURES

- welded stainless steel cylinder.
- chrome plated brass valve body.
- stainless steel handle & lever.
- pressurised with standard chuck.
- controlled on/off discharge.
- manufactured to Australian Standard 1841.3.

APPLICATIONS

- A Class Fires (those involving paper, wood textiles etc).
- F Class Fires (those involving cooking oils and fats).

INSPECTION & MAINTENANCE

Should be done every six months with Australian Standard 1851.

AB:E DRY POWDER EXTINGUISHERS

FEATURES

- rugged epoxy coated all steel cylinders, resist corrosion, dents and punctures.
- chrome plated brass valve body.
- stainless steel handle and lever.
- stainless steel hose retaining clip and band.
- rugged epoxy coated metal vehicle type bracket on 1.0kg model.

APPLICATIONS

- A Class Fires (paper, wood, textiles etc).
- B Class Fires (flammable liquid fires such as oils, paints and solvents).
- C Class Fires (flammable gas fires).
- E Class Fires (energised electrical fires such as switchboards and electrical motors).

INSPECTION & MAINTENANCE

Should be done every six months with Australian Standard 1851.

B:E DRY POWDER EXTINGUISHERS

FEATURES

- rugged epoxy coated all steel cylinders, resist corrosion, dents and punctures.
- chrome plated brass valve body.
- stainless steel handle and lever.
- stainless steel hose retaining clip and band.
- rugged epoxy coated metal vehicle type bracket on 2.5kg model.

APPLICATIONS

- suitable for B Class Fires (flammable liquid fires such as oils, paints and solvents).
- suitable for C Class Fires (flammable gas fires).
- suitable for E Class Fires (energised electrical fires such as switchboards and electrical motors).

INSPECTION & MAINTENANCE

Should be done every six months with Australian Standard 1851.

9.0 LITRE AIR FOAM EXTINGUISHERS

FEATURES

- welded stainless steel cylinder.
- chrome plated brass valve body.
- stainless steel handle and lever.
- controlled on/off discharge.
- pressurised with standard air chuck.
- corrosion resistance.
- manufactured to Australian Standard 1841.4

APPLICATIONS

- suitable for A Class Fires (those involving paper, wood, textiles etc).
- suitable for B Class Fires (those involving flammable liquid fires such as oils, paints and solvents).
- should not be used on E Class Fires (electrical).

INSPECTION & MAINTENANCE

Should be done every six months with Australian Standard 1851.

FEATURES

- welded stainless steel cylinder.
- chrome plated brass valve body.
- stainless steel handle and lever.
- controlled on/off discharge.
- pressurised with standard chuck.
- supplied with water inhibitor.
- manufactured to Australian Standard 1841.2

APPLICATIONS

- suitable for A Class Fires (paper, wood, textiles etc).
- should not be used on any other type of fire.

INSPECTION & MAINTENANCE

Should be done every six months with Australian Standard 1851.

CARBON DIOXIDE (CO₂) EXTINGUISHERS

FEATURES

- lightweight aluminium cylinder.
- chrome plated brass valve body.
- rugged epoxy coated finish.
- stainless steel handle and lever.

APPLICATIONS

- suitable for B Class Fires (those involving flammable liquid fires such as oils, paints and solvents).
- suitable for E Class Fires (those involving energised electrical fires such as switchboards, electrical motors and electronic equipment).

INSPECTION & MAINTENANCE

Should be done every six months with Australian Standard 1851.

- Lightweight and compact

EASY TO USE

Once a first responder activates the device and applies the QUIK-PAK™ electrode pads to the victim, the defibrillator analyses the heart rhythm and is designed to determine if a shock is needed with an easy-to-locate, flashing shock button.

PROVIDES THE MOST POTENT DEFIB ENERGY AVAILABLE

The LIFEPAK EXPRESS has the capability to escalate energy up to an industry-leading 360J.

RELIABLE AND EASY TO OWN.

A readiness indicator lets you know the defibrillator is prepared to do its job. The battery charger and electrodes have a synchronised replacement schedule that makes your maintenance program efficient and affordable.

CODE	DESCRIPTION

LIFEPAK® CR2 DEFIBRILLATOR WITH LIFELINKCENTRAL™ AED PROGRAM MANAGER

FEATURES

- Self-monitoring
- Wireless connectivity
- Fastest time to first shock
- cprINSIGHT™ Analysis Technology
- Layered, easy to follow design

Layered Design

Layered design with easy to follow bold graphics. Both trained and untrained AED users clearly know how to begin.

QUIK-STEP™ Electrodes

Peel directly off the base for faster placement.

cprINSIGHT Analysis Technology

Analyses for shockable rhythm during chest compressions with no need to pause.

Metronome and CPR Coaching

Sets an effective pace and audibly guides users.

ClearVoice™ Technology

Detects background noise and adjusts volume accordingly for clear instruction.

Fully Automatic

Available in fully or semi-automatic models.

Highest Available Escalating Energy

Up to 360J for more effective shocks as needed.

Bilingual

Toggle between two pre-set languages when using the device.

Child mode

Child mode delivers lower energy levels appropriate for young children without having to change electrodes.

LIFEPAK TOUGH™

IP55 rating for challenging environments.

8-year Warranty

Backed by an 8-year warranty.

LIFELINKcentral AED Program Manager

Monitor AED programs by tracking AED status, sending patient data to emergency responders and hospitals, detecting AED locations and other tools.

99512-000120	Lifepak CR2 Defibrillator Fully Automatic

LIFEPAK® CR PLUS DEFIBRILLATOR

SIMPLE TO USE

- Simple to turn on
- Simple to find, remove and place electrodes correctly
- Simple to deliver therapy—just push flashing button when prompted
- Simple to increase the chance for survival by automatically escalating energy up to 360 joules if needed

SIMPLE TO OWN

- The CR Plus comes ready to use: Initial purchase includes carry case, extra electrodes, extra CHARGE-PAK™ battery charger and Ambu® Res-Cue Mask® Kit
- Lowest total cost of ownership in the AED industry
- Simple transition to EMS teams who also use LIFEPAK products

SIMPLE TO MAINTAIN

- One of the longest warranties in the industry at 8 years
- Synchronized CHARGE-PAK battery charger and electrode replacement cycle

CODE	DESCRIPTION
80403-000239	Lifepak CR Plus Fully Automatic Defibrillator

LIFEPAK® 1000

Rugged Construction

Rigorously drop-tested device and protective case and bumpers.

Vehicle Friendly

Designed to ride along in any vehicle without damage from continuous vibrations and other movement.

Flexible Power Options

Choose between a rechargeable Lithium-ion (Li-ion) or non-rechargeable Lithium-Manganese Dioxide (Li MnO₂) battery for your device.

360 Joules

Can escalate defibrillation power to an industry- leading 360J.

cprMAX™ Technology

Minimizes CPR interruptions by allowing compressions to continue during AED charging.

CPR Countdown Timer

Provides direction for length of hands-on time for each CPR period based on system protocol.

ECG Capability

3-lead ECG function is available when needed.

Shock Counter

Digitally records and displays delivered shocks for added insight.

Large Display

Large, easy-to-read LCD screen provides more information at a glance.

Compatible Technology

Electrodes are fully compatible with all other LIFEPAK defibrillators and monitors.

Programmable

Adjust settings to match your team's CPR and resuscitation protocols.

Easy-To-Use AED

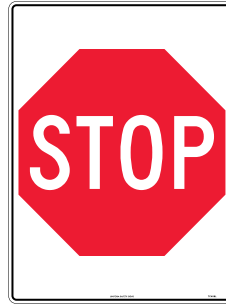

Loud voice prompts and on-screen graphics provide guidance on applying electrodes and initiating a shock.

HEAVY DUTY STEEL SPEED MODULE

FEATURES

- Designed to comply with AS/NZS 2890.1:2004.
- More than four times the load bearing contact area with the road surface than competitor's products.
- Can be used with or without rubber end caps.
- Comes complete with all fixings.
- Truly independent modules for easy removal.
- Does not need a rubber underlay to prevent rattle.
- Concealed fixings remain accessible.
- Modules have a built in bridge design to accommodate hoses or cables.

APPLICATIONS

These end caps are moulded from an extremely durable rubber, or alternatively, steel end caps are also available if preferred. Suitable for car parks, shopping centres or factory complexes.

CODE	SIZE	DESCRIPTION

RUBBER SPEED MODULE

FEATURES

- Designed to comply with AS/NZS 2890.1:2004.
- Can be used with or without end caps.
- Comes complete with all fixings.
- Concealed fixings remain accessible.
- Built in bridge design to accommodate a cable or hose (when used without end caps).

APPLICATIONS

This speed hump is an economical alternative to more expensive models. It is ideally suited to low traffic environments such as unit and town house developments or for short term installations.

They are manufactured from a mixture of natural and recycled rubber. When laid in an alternating pattern they conform to AS/NZS 2890.1:2004. Can also be used as a liquid bunding if installed with a sealant. e.g. silastic.

ABSORBENTS

Select Mini-Booms

A cost effective range of absorbent socks.

To compliment the range you can't go past the Select sock. All the benefits of a sock available in three grades, general purpose, oil only and chemical.

Two sizes 1.2m and 2.4m – make your choice.

General Purpose, Oil only and Chemical Pillows

Absorb large quantities of liquid – fast.

Easy to toss into action. The pillow's large surface area speeds up absorption and shortens the overall clean up time.

Hundreds of uses! Pillows are easily placed in hard-to-reach areas, under machines, behind leaky hoses, wedge them in a tight corner, or even use them to plug up a drain when there's no drain cover available.

Available in three grades and two handy sizes – standard 380mm x 230mm and large 500mm x 400mm.

CODE	SIZE	DESCRIPTION	QTY
LXA188023	380mm x 230mm	General purpose pillow	Packet of 24
LXA188045	500mm x 400mm	Large general purpose pillow	Packet of 10
LXA188223	380mm x 230mm	Oil-only pillow	Packet of 24
LXA188245	500mm x 400mm	Large oil-only pillow	Packet of 10
LXA188423	380mm x 230mm	Chemical pillow	Packet of 24
LXA188445	500mm x 400mm	Large chemical pillow	Packet of 10

General Purpose, Oil only and Chemical Dimpled Pads

Oil only pads are hydrophobic – they don't absorb water. Great for oil spills, on land, or in water. Chemical pads – for those aggressive cleaning jobs, or General Purpose pads – the all rounder that absorbs oils, chemicals and water.

100% polypropylene fibres, constructed with no coverstock, for maximum absorbency. Dimpled for extra strength and resistance to tearing.

All grades come in either heavyweight or lightweight pads, both perforated down the middle.

Consider the lightweight option. Exactly the same, but half the thickness. So twice as many pads in one pack, absorbing the same amount, over twice the area.

CODE	SIZE	DESCRIPTION	QTY
LXA141030	500mm x 400mm	Dimpled general purpose lightweight Pad	Packet of 200
LXA188045	500mm x 400mm	Large general purpose pillow	Packet of 10
LXA141235	500mm x 400mm	Dimpled oil-only lightweight Pad	Packet of 50
LXA141260	500mm x 400mm	Dimpled oil-only heavyweight Pad	Packet of 100
LXA141211	1000mm x 1000mm	Dimpled oil-only heavyweight mat	Packet of 25
LXA141430	500mm x 400mm	Dimpled chemical lightweight Pad	Packet of 200
LXA141460	500mm x 400mm	Dimpled chemical heavyweight Pad	Packet of 100

Dimpled Rolls

Two widths of rolls, 500mm and 1m. Both 40m long for maximum coverage. Dimpled for strength and resistance to tearing, and perforated for convenience and economy of use. Rolls come in both heavyweight and lightweight grades. A strong and absorbent traditional product.

CODE	SIZE	DESCRIPTION
LXA142214	1m x 40m	Dimpled oil-only heavyweight roll
LXA142254	500mm x 40m	Dimpled oil-only heavyweight roll

LXA143254	500mm x 40m	Dimpled oil-only lightweight roll

GRANULAR ABSORBENTS

There are certain applications that require the use of granular absorbents. All absorbents have different characteristics that need to be carefully considered before making a choice. All LiquaSweep granular absorbents can absorb oils, fuels, solvents, chemicals and paints. LiquaSweep X500 contains Bio-remedial products which assist in the decomposition of hydrocarbon.

LiquaSweep X300

A cost effective loose absorbent. Non slip, fast wicking, non-leaching and landfill friendly.

LiquaSweep X500

This lightweight, bio-remedial absorbent actually 'eats' oils and fuels. Non-toxic, non-abrasive, bio-degradable and suppresses vapours. Effective on both land and water.

LiquaSweep X700

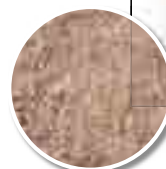

The 100% organic, premium grade lightweight absorbent. Bio-degradable, non-leaching and landfill friendly. Sweeps very clean and leaves no residue. Can be used on both land and water.

LiquaSweep X900

A natural sea sponge with a huge absorption capacity. Stays dry and granular even when saturated. Due to its non-leaching characteristics, it can be disposed of in appropriate land fill areas. Ideal for road transport spills.

FULL DOME SAFETY MIRRORS

Crystal View full dome mirrors are ideally suited for busy pedestrian intersections in offices, corridors, warehouses and loading docks.

They provide a full 360 degree view that allows you to see blind spots “around corners” in four directions at once. The use of full dome mirrors has been shown to reduce the risk of person to person collisions in busy office environments as well as person to vehicle collisions in carparks and warehouse environments. Full dome mirrors also provide outstanding visibility for retail security and help prevent the incidence of shop lifting. Our smaller sized 300mm and 450mm mirrors are a great solution to office environments and lunch areas. Hospital corridors, loading docks and warehouse bays are well suited for our larger 650mm and 800mm mirrors.

Key Features

- Crystal View Mirrors are made from 3mm thick, high quality acrylic material. This means the reflected image does not distort as it does with cheap polycarbonate mirrors. Distorted images can lead to accidents because they don't provide an accurate view of potential hazards. Polycarbonate mirrors are flimsy, prone to cracking and will lose their reflective qualities over a short time due to their adverse reaction to many cleaning products.

- Highly engineered low profile dome minimises space utilisation thus providing extra headroom in low ceiling environments
- Best-in-class curvature profile yields greatest viewing distances at each size category.
- Cross hatching substrate enforces optimal reflectivity – outperforming lesser quality imitators.
- Every Crystal View Mirror comes with heavy duty steel mounting frames to provide rock solid stability once mounted. Many competitor mirrors do not provide mounting frames which results in cracking and breakage over time. The mounting frame can also be used for suspending dome mirrors from chains in high bay warehouse settings.

INSTALLATION

Installation of Crystal View Full Dome mirrors is a breeze and does not require specialised knowledge or experience. Once installed properly, your mirror will provide years of trouble free service. Detailed instructions are provided in the box with each mirror.

Installation Time: Approx. 30 minutes

Tools Required: Philips Head Screw driver or drill.

Suitable Mounting Surfaces: Wood, Metal, Fibreboard.

- Can also be mounted on warehouse racking or suspended from metal chain.
- Supplied with a mounting frame for extra stability.

HALF DOME SAFETY MIRRORS

Crystal View half dome mirrors are ideally suited for busy pedestrian intersections in offices, corridors, warehouses and loading docks. They provide a full 180 degree view which make them perfect for T sections. The use of half dome mirrors has been shown to reduce the risk of person to person collisions in busy office environments as well as person to vehicle collisions in carparks and warehouse environments by showing you what is coming around the corner. Half dome mirrors also provide outstanding visibility for retail security and help prevent the incidence of shop lifting. Our smaller sized 300mm and 450mm mirrors are a great solution to office environments and lunch areas. Hospital corridors, loading docks and warehouse bays are well suited for our larger 650mm and 800mm mirrors.

Key Features

QUARTER DOME SAFETY MIRRORS

Crystal View half quarter dome mirrors are ideally suited for busy pedestrian intersections in offices, corridors and hospitals/aged care facilities. They provide a full 90 degree view which is perfect for tight corners or cramped spaces. The use of quarter dome mirrors has been shown to reduce the risk of person to person collisions in busy environments. Quarter dome mirrors give a broad range of view on a blind corner.

Key Features

- Crystal View Mirrors are made from 3mm thick, high quality acrylic material. This means the reflected image does not distort as it does with cheap polycarbonate mirrors. Distorted images can lead to accidents because they don't provide an accurate view of potential hazards. ACRYLIC CONVEX SAFETY MIRRORS

Crystal View convex mirrors are ideally suited for busy pedestrian areas in intersections, shared traffic and pedestrian zones. These mirrors are great to use as theft deterrents and are ideal for car parks, factories, loading docks, shopping centres and any other place where your vision may be impaired by blind spots and obstacles. Our smaller sized 300mm and 450mm mirrors are a great solution to office environments and lunch areas. Hospital corridors, loading docks and warehouse bays are well suited for our larger 600mm mirrors.

Key Features

- Crystal View Mirrors are made from 3mm thick, high quality acrylic material. This means the reflected image does not distort as it does with cheap polycarbonate mirrors. Distorted images
- Can lead to accidents because you do not get an accurate view of potential hazards. Polycarbonate mirrors are flimsy, prone to cracking and will lose their reflective qualities over a short time due to their adverse reaction to many cleaning products.

HEAVY DUTY STEEL SPEED MODULE

FEATURES

- Designed to comply with AS/NZS 2890.1:2004.
- More than four times the load bearing contact area with the road surface than competitor's products.
- Can be used with or without rubber end caps.
- Comes complete with all fixings.
- Truly independent modules for easy removal.
- Does not need a rubber underlay to prevent rattle.
- Concealed fixings remain accessible.
- Modules have a built in bridge design to accommodate hoses or cables.

APPLICATIONS

These end caps are moulded from an extremely durable rubber, or alternatively, steel end caps are also available if preferred. Suitable for car parks, shopping centres or factory complexes.

Do Not Overtake Turning Vehicle Signs: This sign may be attached to the rear of heavy vehicles **over 7.5 metres long**. Traffic following behind you must be able to see it clearly. The sign allows the driver to **occupy space outside** an assigned lane when turning so long as:

- The vehicle is within 50 metres from the corner
- The move can be made safely
- Wherever possible, you should set up the back of your vehicle so that traffic behind you cannot overtake your vehicle on the side you are turning it.

HEAVY DUTY STEEL SPEED MODULE

FEATURES

- Designed to comply with AS/NZS 2890.1:2004.
- More than four times the load bearing contact area with the road surface than competitor's products.
- Can be used with or without rubber end caps.
- Comes complete with all fixings.
- Truly independent modules for easy removal.
- Does not need a rubber underlay to prevent rattle.
- Concealed fixings remain accessible.
- Modules have a built in bridge design to accommodate hoses or cables.

APPLICATIONS

These end caps are moulded from an extremely durable rubber, or alternatively, steel end caps are also available if preferred. Suitable for car parks, shopping centres or factory complexes.

CODE	SIZE	DESCRIPTION
SM1000B	1000mm	Black/Yellow Body Module - Slo-Motion Standard Duty Steel Speed Humps
SMCECY		Yellow End Module - Slo-Motion Standard Duty Rubber End Cap to Suit SM1000

RUBBER SPEED MODULE

FEATURES

- Designed to comply with AS/NZS 2890.1:2004.
- Can be used with or without end caps.
- Comes complete with all fixings.
- Concealed fixings remain accessible.
- Built in bridge design to accommodate a cable or hose (when used without end caps).

APPLICATIONS

This speed hump is an economical alternative to more expensive models. It is ideally suited to low traffic environments such as unit and town house developments or for short term installations.

They are manufactured from a mixture of natural and recycled rubber. When laid in an alternating pattern they conform to AS/NZS 2890.1:2004. Can also be used as a liquid bunding if installed with a sealant. e.g. silastic.
