SAFETY AT EVERY STEP

ENTRY MATTING

CLEANER AREAS IMPRESS YOUR CUSTOMERS

ENTRANCE MATS CAN REMOVE UP TO 80% OF DIRT AND ALLERGENS FROM THE SOLES OF SHOES.

As employees and customers travel into the building their shoes bring the outdoors in, be it rain, dirt or muck. During wet or the winter months, it is important that your building entryways have entry mats that are large enough to ensure moisture and wet shoes are stopped at the door. Using entry mats is a simple measure to keep moisture and dirt contained in one manageable area. This will also minimise the risk of a slip hazard throughout the building.

WHAT SIZE SHOULD MY ENTRY MAT BE?

The common answer to this question is 8 steps or 4m but this will depend on a number of different aspects and conditions including traffic flow, surrounding conditions and the internal floor. Ask your self the following questions;

1. How much foot traffic enters the building per hour / day?
2. Do you have trolleys coming through this entry?
3. Is there cover on the building before they walk onto the entry mat? If so what is the size?
4. What is your internal floor covering? Ceramic tiles/ carpet.

Send your results to sales@mattek.com.au to get your FREE evaluation on the right size and entry mat required for your building.

<p>FIRST IMPRESSIONS COUNT</p> 	<p>60% OF MAINTENANCE IS IN FLOORING</p>	<p>94%</p>

WET WEATHER ROLL OUT MATS

Roll out mats or Wet weather mats are commonly used in areas where a larger recessed mat is not possible. These mats can be stored and rolled out on rainy days to absorb any excess moisture from customers coming through the doors.

Here are a few important factors of an effective wet weather mat;

- **Good Quality edging** – this helps prevent the edges curling and creating a trip hazard.
- **Rubber backing** – Rubber has a great memory, so it lays flat quickly after it is rolled out.
- **Bi-Level pattern** – this maximises the amount of moisture and dirt contained by the mat.
- **Size** – it is important that the mat is adequate to do the required job and not stepped over.
- **Position** - Incorrectly positioned wet weather mats can cause trip hazards

RECESSED ENTRY MAT

Recessed entry mats are designed to sit in a mat well and be flush with the surrounding floor finish. Entry mats that are recessed into the floor offer should be considered over surface mounted mats where possible as they create a seamless and safe transition on and off the mat.

Few important factors of an effective recessed entry mats;

- **Glued into position** – All recessed mats should be glued down to prevent movement.
- **Quality backing** – When cheap backing is glued into place the backing can come away from the fibre making the mats move out of the recess and create trip hazards and potential injury.
- **Bi-Level pattern** – this maximises the amount of moisture and dirt contained by the mat.
- **Size** – it is important that the mat is adequate to do the required job and not stepped over.

FIXED SURFACE MOUNTED ENTRY MAT

Fixed surface mounted entry mats are used the place of recessed entry mats and are needed to be fixed to prevent movement. Surface mounted mats are cost reducing alternative when considering increasing the size of existing mats.

Few important factors of Fixed surface mounted entry mats;

- **Compliant** – All frames should be compliant with the relevant Australian Standards.
- **Durable** – The frames and the entry mat should be heavy duty to take the high pressure high volume foot traffic, trolley use and maintenance equipment.
- **Seamless** – There should be a seamless transition up onto and off the entry mat.
- **Size** – it is important that the mat is adequate to do the required job and not stepped over.

CUSTOM SHAPED ENTRY MATS

Often door mat's are irregular shaped and need to be made to suite the area they are positioned.

Our easy 3 step process for custom size and shaped entry mats is as follows;

- STEP 1**  **Measure** - MatTek offer free on site measuring and consultation. We can also use drawings and plans supplied to make custom mats.
- STEP 2**  **Manufacture** - MatTek manufacture all custom made mats in their warehouses to ensure accuracy and the perfect fit.
- STEP 3**  **Install** - Our installation team can look after all custom made mats that are required to be installed.

LOGO MATTING

CREATE FANTASTIC FIRST IMPRESSIONS

First impressions are always the most memorable. Logo mats help brighten up the entrance and encourage positive vibes.

Personal branded logo mats are a brilliant way of marketing and impressing your customers at the first instance. Whether it be the main front door mat, a loose lay mat for a mat for a tenancy, custom logo mats can be used to brighten up any area as well as convey any important messages. At MatTek we offer a large range of custom matting solutions to help you create the "WOW" factor in your facilities.

DIFFERENCE BETWEEN PRECISION CUT AND PRINTED MATS.

Precision Cut Logo Mats: Precision cut logo mats are ideal for high traffic areas meaning they not only look fabulous but are also executive at removing dirt and moisture

Printed Logo Mats: Printed logo mats are ideal for brand awareness to convey that first impression at that crucial point when visitors cross the entrance into your shopping mall or building.

HOW TO PURCHASE YOUR LOGO MAT

There are 3 simple steps to arranging a logo mat:

- 1 Product Selection**
Not sure what product you need, call us on 1300 365 012
- 2 Design**
Send us a high definition image of your logo (Files include PDF, JPG, AI)
- 3 Confirm and Order**
Upon confirmation of the design and quote we will process this mat and install or deliver the mat within 2 - 4 weeks.

HEAVY DUTY LOGO MATS

Our heavy duty logo mats are designed for to suite areas with heavy or extreme traffic as well as offering a superior, eye-catching finish. Each component of the design is precision-cut from high quality fibres using robotic technology.

Here are a few important factors of an effective heavy duty logo mat;

- **Durable**- Both the background material and the insert material should be durable and able to stand up to extreme traffic and conditions.
- **Colours** - Designs and colours must be chosen wisely to ensure they are effective against stain sand dirt in high traffic areas.
- **Effective** - The logo mat must create an eye catching impression but they mat should also be effective in preventing dirt and moisture entering the building.

PROMOTIONAL PRINTED LOGO MATS

Promotional printed logo mats are a great way to get your message across to everyone who walks through the main entrance or building . Printed logo mats allow you to effectively communicate your brand ensuring that you leave your customer with a long lasting impression.

Here are a few important factors of an effective wet weather mat;

- **Position** - this helps prevent the edges curling and creating a trip hazard.
- **Rubber backing** - Rubber has a great memory, so it lays flat quickly after it is rolled out.
- **Bi-Level pattern** - this maximises the amount of moisture and dirt contained by the mat.
- **Size** - it is important that the mat is adequate to do the required job and not stepped over.
- **Position** - Incorrectly positioned wet weather mats can cause trip hazards

SPECIALIST MATTING

SPECIAL MATS TO KEEP YOUR FACILITIES SAFE, CLEAN AND PRODUCTIVE

DID YOU KNOW?

SLIPS, TRIPS AND FALLS ARE ON THE RISE.

GLOBALLY, SLIPS, TRIPS AND FALLS ARE THE SECOND LEADING CAUSE OF UNINTENTIONAL INJURY AND DEATH AFTER TRAFFIC ACCIDENTS

ADULTS OVER

70

ESPECIALLY WOMEN, HAVE A HIGHER MORTALITY RATE RESULTING FROM FALLS THAN YOUNGER ADULTS

SLIPS, TRIPS AND FALLS ARE THE SECOND LEADING CAUSE OF WORKPLACE INJURIES, ACCOUNTING FOR OVER

20%
OF ALL INJURIES

IN AUSTRALIA, DEATHS FROM SLIPS AND FALLS ARE FIVE TIMES MORE PREVALENT THAN DEATHS DUE TO A FIRE

A UNIVERSITY STUDY FOUND THAT IN JUST A THREE-YEAR PERIOD, FALLS IN BUILDINGS INCREASED BY ALMOST

15%

THE TWO TOP PLACES WHERE SLIPS, TRIPS AND FALLS OCCUR ARE IN THE HOME AND IN NURSING / RETIREMENT HOME FACILITIES

Several of the studies conducted during the last ten years cover trends for a specific group of people. Many of the groups studied are statistically more prone to these kinds of accidents.

The elderly, children and people working in certain jobs have a higher risk of being injured and suffering more severe and longer-lasting injuries:

REDUCE OVERHEADS

Cleaning and maintaining the floors of a commercial building or shopping centre is a mammoth task, with staff working round the clock to dry up wet patches, mop away dirt, and vacuum up the dust and debris dragged around by thousands of busy customers. The cost of this manpower – and then all the equipment and supplies – is enough to make you wince.

Having strategically placed safety mats throughout the building can reduce cleaning and maintenance costs but also extend the lifeline of your internal floors.

It's also worth noting that when shoppers do fall and hurt themselves because of a wet or slippery floor, they often take legal action against the centre itself, and this could end up costing millions of dollars.

REDUCE ACHES AND PAINS

Concierge and reception staff are sometimes required to stand or sit for a long period of time making it necessary to provide support and comfort for them to be 100% productive.

- **Anti-Fatigue mats** - these mats help prevent fatigue in legs and back by providing comfort but also by increasing blood flow in these areas. Reducing fatigue will increase productivity.
- **Chair Mats** - These mats are designed to be used under chairs to prevent damaging the floor but also to reduce the stress on workers when moving the chairs.

DO YOU NEED LARGER ENTRY MATS?

MatTek do a lot more than just sell mats, we create clean areas by creating mats that suit the application in size, location and type.

1

TEMPLATE MATS
FOR EXACT FIT
